ABOUT THE VIRTUAL ENERGY FAIR

The German Energy Fair Vietnam is a virtual B2B trade fair connecting German exhibitors from the energy sector to potential Vietnamese buyers and clients. It is also open to the general public – online, bilingual and free of charge.

Format: fully virtual, browser-based platform

Date: Nov. 30 - Dec. 31, 2026 with the option of extension

Scope: entire energy value chain: renewables, storage, grids, hydrogen, energy efficiency, engineering and services

Target audience: utilities, project developers, industrial energy users, system integrators, distributors, and more

A platform that keeps working for you.

HOW DOES IT WORK?

1 **Registration**
Register until 30.11.2026 using **this link**

2 **Upload Your Materials**
Upload your logo, text materials, pictures, video, contact details etc. in the registration form

3 **We Set Up Everything Online**
Give feedback and confirm your virtual booth, set up by AHK Vietnam free of charge

4 **Start of the Promotion**
We will promote the fair via all our channels: website, newsletters, social media, targeted emails etc.

5 **Webinar Launch in November 2026**
Be part of the online launching event with Vietnamese companies

6 **Fair Trade Stays Online**
After the initial launch, the fair stays online until Dec. 31, 2026, with an option to extend

Opportunities in Vietnam's energy transition

Vietnam is reshaping its power sector to meet growing electricity demand, strengthen energy security and advance decarbonisation.

- **Solar and wind remain key priorities,** with ambitious capacity targets towards 2030.
- **Offshore wind offers long-term potential,** while onshore and nearshore wind present nearer-term opportunities.
- **Battery storage and grid modernisation are gaining momentum,** creating demand for new technologies and expertise.
- **Renewables, energy efficiency and green hydrogen** are part of Vietnam's longer-term energy transition.
- Vietnam is committed to **net zero by 2050**, driving its long-term energy transition

Turning ambitions into viable projects with German technology, engineering and expertise.
